

\$1.1M/Month Win

How RevFirma Helped Nabors Secure Scalable Growth with OpCo X

Industry: Oilfield Services

Seller: Nabors Industries

Buyer: OpCo X

Use Case: Digital-first sales aligned to operational scalability

Challenge

On February 3, Nabors deployed RevFirma to target 16 of the most operationally excellent opportunities: buyers who both needed and could benefit most from Nabors' offerings. This aligned with Nabors' focus on high-impact accounts where scalable value could be delivered.

OpCo X was one of those 16 high-priority targets. There was no active buyer intent, only signals pointing to scale, operational fit, and digital readiness.

At the time, 42 competitors were capable of fulfilling the same scope of work. Speed, clarity, and message relevance were essential to stand out and secure the deal before the window closed.

Solution

RevFirma launched a tailored, digital-first campaign built for speed and adaptability:

- Live in under 24 hours across 24 digital platforms
- 28 days of continuous engagement with 8 evolving value propositions
- Messaging refined in real time based on behavioral signal tracking
- Targeted both field and office decision-makers to ensure internal alignment

By Day 28, RevFirma detected buying readiness. On Day 30, OpCo X reached out to Nabors, turning digital engagement into real-world action.

Results

- Campaign deployed in under 24 hours
- 8 message iterations refined over 28 days
- Messaging frequency: 1 conversion per 493 impressions
- Buyer-initiated engagement on Day 30
- 5 rig contracts awarded
- \$1.1M in monthly recurring revenue secured
- \$5,500 total sales cost to win (1/6th of platform fee)

Bottlenecks Post-Intent

- 5-day delay for in-person follow-up in Midland
- 10-day CapEx deployment was required to fulfill the scope
- The delay was internal, not buyer-driven
- These events allowed RevFirma to capture operational feedback and adjust future campaigns to eliminate similar delays

Why It Worked: Understanding OpCo X

OpCo X prioritizes:

1. **Influence:** decisions require cross-functional alignment
2. **Cost:** they value solutions that scale without adding complexity

RevFirma delivered on both:

- Reached and aligned multiple layers of decision-makers
- Positioned Nabors as a low-friction, high-availability partner
- Maintained buyer control: no pressure, just clarity

Key Insight

This wasn't just a sale. It was a change in how OpCo X makes decisions.

RevFirma didn't chase. It connected.

It didn't push. It positioned.

And in 30 days, it turned a cold opportunity into a \$1.1M/month contract, with just \$5,500 in total sales cost.
